MATHEMATICS

- Fearless Symmetry: Exposing the Hidden Patterns of Numbers

By Avner Ash, professor of mathematics, Boston College, and Robert Gross, associate professor of mathematics, Boston College. Princeton University Press, £11.50. ISBN 9780691138718

Addressing representation theory and reciprocity laws, this book focuses on how mathematicians solve equations and prove theorems. It discusses rules of maths and why they are just as important as those in any other games.
